A note about pricing....

With inflation rates soaring over 8%, we find it difficult to forecast food prices for future events. Prices shown here are calculated as of **04/2023**, with a National Food Cost Index of **134.76**. The FCI is merely a number that measures the change in food costs. More information can be found at <https://indexmundi> or a simple Google search. Your final invoice may be adjusted (plus or minus) due to the net change in the FCI from the original quote
